Hovermap
Leading the way in drone autonomy and mapping.

Hovermap, developed by Emesent, is a LIDAR mapping and autonomy payload which provides a complete solution for inspection and mapping of Assets. The SLAM based solution, no GPS required, is ideal in situations such as mines, tunnels, under cover or other GPS denied applications and provides 360-degree active collision avoidance for drones. The award winning Hovermap is also suitable for above ground Lidar mapping and can be used as a handheld mapping device. Hovermap, providing your business with previously unavailable solutions.

Craig Setch of Setch Design says.
I am blown away by the Hovermap. The time savings achieved in the field and the office are ridiculous!
