

GNSS correction service

SmartNet is the GNSS correction service built on Australia's largest reference station network, enabling GNSS devices to quickly determine precise positions.

High-accuracy GNSS antenna

- Leica FLX100 GNSS smart antenna
- Multi-constellation as standard
GPS, Glonass, Beidou and Gallileo
- RTK accuracy
Horizontal 2cm + 1ppm
Vertical: 3cm + 1ppm
- Compatible with Android and Windows
- Up to 20 hours operating time
- IP67 all weather

Ruggedized Android Tablet

- Leica Tab 2 Android tablet
- IP67 and lightweight
- 8" sunlight readable touch screen
- Up to 15 hours (Lithium-ion 8200 mAh)
- Carbon-fibre survey pole incl. tablet bracket and pole mount

Powerful GIS / Surveying App

- Leica Zeno Mobile
- Targeted at non-surveyors, interaction with Zeno Mobile is simple and intuitive, providing advanced functionality without the need for extensive training
- Project creation, data capture, complex editing, data import / export, WMS, multi-feature collect and stakeout and smart positioning
- Esri ArcGIS Online compatibility and more
- Integration with utility locator, laser disto and rangefinder
