

EOFY 2022 PROMOTION

IDS C-thrue Concrete Scanner

Rebar/void automatic insight capabilities that improve safety before cutting or drilling into concrete up to 80cm depth range

\$25,790 INCL. GST

C-thrue

OFFER INCLUDES:

- C-THRUE all-in-one Ground Penetrating Radar (GPR)
- Online training with certificate of competency
- 1-year standard warranty
- No recurring fees
- Full Repair & support centres across Australia by C.R. Kennedy
- Free delivery within mainland Australia

Optional recommended accessories:

- **Panasonic Toughpad FZ-G2 (10.1")**
Includes single user license (perpetual) to control the C-thrue from a Panasonic FZ-G2 tablet and to review and analyse scans on a desktop
- **C-thrue remote handle**

FEATURES AND BENEFITS:

Clearer and faster surveys

Detection of both first and second levels of rebars thanks to the system's dual polarisation.

Safe drill in the surveyed structure

Rebar/void automatic insight capabilities that improve safety before cutting or drilling into the concrete. Up to 80 cm depth range.

Fully-visible, multi-touch display

Data displayed on the screen are never obscured by the handle or the user's hand.

Simplified data interpretation

Optimal decision-making supported by visualisation of acquired data in 3D.

Increased data accuracy

Eliminate manual, error-prone paper grids with an automatic positioning and navigation system.

Advanced data visualisation

Automated data acquisition and analysis

Automatic detection of the first layer of rebars and result exportation.

Flexibility everywhere

Lightweight, compact, drop resistant and transportable system.

Terms & Conditions
